1 Basma owns a toy shop.

(a) The sign shows the opening hours for the shop.

Saturday to Wednesday	10 30 to 18 00
Thursday and Friday	10 00 to 19 30

Work out the length of time the shop is open in one week.

..... hours [1]

(b) Basma employs 5 sales assistants and 2 supervisors.

On one particular week, the 5 sales assistants each work for 30 hours and the 2 supervisors each work for 38 hours.

For that week, the total amount Basma pays these 7 employees is \$3324.70 .  
Basma pays each sales assistant \$13.45 per hour.

Calculate the amount Basma pays each supervisor per hour.

\$ ..... per hour [3]

(c) The exchange rate between dollars (\$) and pounds (£) is \$1 = £0.77 .

Basma buys 50 identical games for a total of £245.  
She makes a profit of 39% when she sells each game.

Calculate the selling price of one game in dollars.  
Give your answer correct to the nearest cent.

\$ ..... [4]

(d) Basma invests \$12 000 in an account paying compound interest at a rate of 1.5% per year.

At the end of year 1, she invests another \$12 000 in the same account.

At the end of year 4, she takes \$20 000 out of the account.

Calculate the amount of money remaining in the account at the end of year 4.

Give your answer correct to the nearest cent.
